Abrar Hussain Qureshi

Abstract:

Developing an Annotated Corpus of Pakistani English as a Research Tool

With the advent of computers, corpora, large electronically stored texts, have been compiled to handle EFL challenges. The research is about to develop a Corpus of Pakistani English of nearly 25 million words. It will help to address the issues of learning, teaching and advance pedagogical research of Pakistani English.

Dr. Qureshi is a Fulbright post-doctoral fellow in the Linguistics Department at theUniversity of North Texas (USA). He has been working in the field of Urdu and English linguistics and got exposure of Corpus Based Urdu-English lexicology as a PhD research associate (2007) and as a postdoctoral researcher on Corpus Based Urdu-English bilingual lexicography (2019) from the Center for Advanced Research in English (CARE) at the University of Birmingham (United Kingdom). He is an ELT certified professional from the University of Oregon, USA (2022) and an Associate Fellow (AFHEA) at Advanced Higher Education United Kingdom (2022).
